PRESIDENT’S MESSAGE

By Daniel Castanon, BS, RHIA

I hope you have been enjoying the much needed rain in San Diego. Now we can look forward to all the beautiful flowers this spring!

Did you know that March 24-30, 2019 is national HIP (Health Information Professionals) week? Please take a minute to pat yourself on the back and acknowledge all that you do. The work that health information administrators do is vital to our communities. Take a moment sometime this month to help educate a layperson about our field and how you contribute to it. In other words, find an opening in a conversation and explain to someone what you do. Here is a link to an AHIMA toolkit for some ideas:

http://www.ahima.org/events?tabid=hipweek

Lastly, thank you everyone who took time to vote for next year’s SDHIA board of directors. We invite you to our May 14th meeting at Tom Ham’s Lighthouse where we will introduce the incoming 2019-2020 board members!
UPCOMING EVENTS

Data Mapping and Interoperability and The Benefits of HIE

Date: March 12, 2019
Time: 5:00 pm to 7:00 pm
Door Registration begins at 4:45 pm
Location: Sharp Techway Building
8520 Tech Way 1st Floor
Room 124 & 125A
San Diego, CA 92123

Speakers:
Maria Hewett, MBA, RHIA
Vilena Boussarova, MS, RHIA, CHDA, CCS

Registration Fee:
$17 CHIA Member
$22 Non-CHIA Member
$10 CHIA Member Student
$15 Non-CHIA Student

Continuing Education
CEU’s: 2
AHIMA Domain: Performance Improvement, Technology

For registration and payment online go to “Register”:

Although online registration is preferred, walk-in registration is available at the meeting site - Cash or Check Only. Please make your check payable to SDHIA
**PAST-PRESIDENT’S MESSAGE**

*By Svetlana Woersching, RHIA, CCS, CPC*

**CHIA/SDHIA Nominating Committee**

The Nominating Committee is pleased to announce the results of 2019-2020 SDHIA and CHIA Ballots. These HIM professionals have dedicated themselves to serve SDHIA and CHIA’s members in the upcoming Fiscal Year and make the HIM profession stronger in the rapidly changing healthcare industry.

Learn more about the [CHIA Leadership Nomination Process](#) and consider submitting your name next year for the 2020 CHIA Ballot.

Again, please congratulate new 2019-2020 SDHIA and CHIA board members. Let’s celebrate at the May 2019 Spring Dinner Reception.
EDUCATIONAL CORNER

By Keith Hass, RHIA

The SDHIA February 2019 monthly meeting was not held, but we did have a wonderful Coding Round Table that took place.

Speakers: Judy Holloway, MPH, RHIA, CCS, CCS-P and John Folger, RHIA, CCS, CCS-P

TOPIC: Updated CPT Codes and ICD-10 CM/PCS Problematic Coding

Judy and John both gave a very interactive session during this Saturday morning event. The objectives of the topic for the audience was met with interest and working discussions. The objectives were:

- Specific Case Examples
- Coding Clinic
- New Codes
- Guideline Changes

Specific examples and changes discussed:

CPT/HCPCS Update
- APC Packaging
- Surgery
- OP Code Editor
- Radiology 2019 Medicare’s OP PPS
- NCCI Edits ICD-10-CM/PCS Coding
- Facility E&M Guidelines
- Problematic Issues

With those areas covered Judy and John brought the audience into deeper insight of BMI, Anemia, Surgery General-Biopsy and Grafts, FNAB, PCNP, CNB as case scenarios examples. The event also made clarifications on the 2019 Medicare’s OP PPS, The Outpatient Coder editor and national Correct Coding Policy manual 2019 Revisions.

Judy and John’s presentation discussion and active participation from audience revolved around how to resolve issues through:

- Improving physician documentation and coding accuracy so it accurately describes the severity of illness of patients that we treat.
- The goal to accurately portray the services we provide, not “game” the system.
- Whatever the ultimate reimbursement rate, accurately reflecting services provided and the reasons for the services that we provide will result in appropriate reimbursement to our organization and support the level of personnel allocated to the patient treatment process.
THANK YOU

SDHIA’s February Coding Roundtable was a huge success! Not only did WIPFLi provide knowledgeable and personable presenters, but also generously sponsored the event! Thank You WIPFLi!!!!

CODING CORNER

PCS Coding: Knee Procedures
By Nancy J Cervi, RHIT, CCDS

Highlights from the ICD-10 Coding Clinic, Fourth Quarter, 2018

This month’s article will review pertinent highlights from AHA’s Fourth Quarter, 2018, Coding Clinic. Be sure to review the complete coding clinic for other important topics.

<table>
<thead>
<tr>
<th>TOPIC</th>
<th>CODING CLINIC ADVICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Endocrine/Body Mass Index Reporting:</td>
<td>Obesity and morbid obesity are always clinically significant and reportable when documented by the provider. In addition, if documented, the body mass index (BMI) code may be coded in addition to the obesity or morbid obesity code. It would be appropriate to assign the BMI as a secondary code with associated diagnoses such as malnutrition, anorexia nervosa or other eating disorders, cachexia, and abnormal weight loss/gain.</td>
</tr>
<tr>
<td>Provider documents obesity or morbid obesity in the history and physical and/or discharge summary only, without any additional documentation to support the clinical significance of this condition, can it be coded?</td>
<td>NOTE: Do not assign codes for the body mass index (BMI) during pregnancy. Assign only code O99.214, Obesity complicating childbirth, with the specific obesity code from category E66-, Overweight and obesity, for obesity complicating delivery.</td>
</tr>
<tr>
<td>OB/Newborn:</td>
<td>Assign code <strong>O99.345</strong>, Other mental disorders complicating the puerperium, and code <strong>F53.0</strong>, Postpartum depression, for postpartum depression. The instructional note “use additional code to identify specific condition,” at category O99, Other maternal diseases classifiable elsewhere, indicates that a secondary code is needed to specify the mental disorder. NOTE: If patient is documented as with postpartum psychosis, assign F53.1 Puerperal psychosis, for postpartum psychosis.</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td><strong>Postpartum depression and Postpartum psychosis:</strong> Provider documents patient is seen 10 days after the birth of her baby and is diagnosed with postpartum depression.</td>
<td><strong>Postpartum depression and Postpartum psychosis:</strong> Provider documents patient is seen 10 days after the birth of her baby and is diagnosed with postpartum depression.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>GI/Hepatobiliary:</th>
<th>Assign code <strong>K80.00</strong>, Calculus of gallbladder with acute cholecystitis without obstruction; code <strong>K82.A1</strong>, Gangrene of gallbladder in cholecystitis; and code <strong>K82.A2</strong>, Perforation of gallbladder in cholecystitis.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Gangrene and Perforation of Gallbladder in Cholecystitis:</strong> Provider documents acute cholecystitis and cholelithiasis with gangrene and perforation of the gallbladder.</td>
<td><strong>Gangrene and Perforation of Gallbladder in Cholecystitis:</strong> Provider documents acute cholecystitis and cholelithiasis with gangrene and perforation of the gallbladder.</td>
</tr>
<tr>
<td><strong>Acute Appendicitis</strong> Provider documents acute perforated appendicitis.</td>
<td><strong>Acute Appendicitis</strong> Provider documents acute perforated appendicitis.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>General Surgery:</th>
<th>Assign code <strong>T81.41XA</strong>, Infection following a procedure, superficial incisional surgical site, for the postoperative wound infection. The infection involved only skin and subcutaneous tissue of the surgical incision. Code <strong>B96.20</strong>, Unspecified Escherichia coli [E. coli] as the cause of disease classified elsewhere, is assigned as an additional diagnosis.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Surgical Site Infection:</strong> Provider documents patient underwent total abdominal hysterectomy. On post-op day three, the incision was intact but there was purulent drainage, slight erythema and induration. Would was cultured and grew E. coli.</td>
<td><strong>Surgical Site Infection:</strong> Provider documents patient underwent total abdominal hysterectomy. On post-op day three, the incision was intact but there was purulent drainage, slight erythema and induration. Would was cultured and grew E. coli.</td>
</tr>
<tr>
<td><strong>Control of Epistaxis:</strong> Provider documents epistaxis with drop in hemoglobin. Silver nitrate is applied to bleeding site via rigid nasal endoscope.</td>
<td><strong>Control of Epistaxis:</strong> Provider documents epistaxis with drop in hemoglobin. Silver nitrate is applied to bleeding site via rigid nasal endoscope.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Fine Needle Aspiration Root Operation when reporting aspiration of tissue, such as lymph tissue</th>
<th>Assign code <strong>R04.0</strong>, Epistaxis, for the epistaxis. Assign code <strong>093K8ZZ</strong> Control bleeding in nasal mucosa and soft tissue, via natural or artificial opening endoscopic for the application of the silver nitrate to control the bleeding.</th>
</tr>
</thead>
</table>
| When reporting fine needle aspiration of tissue, such as lymph tissue, report “Extraction” of the body part for the tissue aspirated when available in the appropriate PCS table. If “Extraction” is not available, then the root operation “Excision” should be reported for fine needle aspiration of tissue. FNA procedures of gas or fluid should be reported to the root operation “Drainage”.
| When reporting fine needle aspiration of tissue, such as lymph tissue, report “Extraction” of the body part for the tissue aspirated when available in the appropriate PCS table. If “Extraction” is not available, then the root operation “Excision” should be reported for fine needle aspiration of tissue. FNA procedures of gas or fluid should be reported to the root operation “Drainage”.

| | **Assign code **R04.0**, Epistaxis, for the epistaxis. Assign code **093K8ZZ** Control bleeding in nasal mucosa and soft tissue, via natural or artificial opening endoscopic for the application of the silver nitrate to control the bleeding. |
| | When reporting fine needle aspiration of tissue, such as lymph tissue, report “Extraction” of the body part for the tissue aspirated when available in the appropriate PCS table. If “Extraction” is not available, then the root operation “Excision” should be reported for fine needle aspiration of tissue. FNA procedures of gas or fluid should be reported to the root operation “Drainage”.
Vascular:
Provider documents **streptococcal Group B sepsis due to a hemodialysis central venous catheter**

**Percutaneous Extracorporeal Membrane Oxygenation**

Central:

Peripheral veno-arterial:

Peripheral veno-venous:

**Denver Shunt** (Placed percutaneously to recirculate ascitic fluid)

**Watchman Device** Insertion and Removal

Assign code **T80.211A**, Bloodstream infection due to central venous catheter, initial encounter, as the principal. Assign code **A40.1**, Sepsis due to streptococcus, group B, as an additional diagnosis, when a centrally inserted hemodialysis catheter is the cause of sepsis. A code from subcategory T80.21-, Infection due to central venous catheter, specifies a central venous catheter, distinguishing it from other dialysis catheters.

Assign code **5A1522F**, Extracorporeal oxygenation, membrane, central.

Assign code **5A1522G**, Extracorporeal oxygenation, membrane, peripheral veno-arterial.

Assign code **5A1522H**, Extracorporeal oxygenation, membrane, peripheral veno-venous.

**NOTE:** Central ECMO cannulation is an open-chest procedure with direct surgical cannulation of the right atrium and aorta. It involves two open insertions, arterial and venous, and provides cardiorespiratory support. In the past, central ECMO was more commonly used; however, peripheral ECMO is more common now.

The objective of placing the Denver (peritoneovenous) shunt is to remove and recirculate ascitic fluid from the peritoneal cavity into the circulation and is classified to operation “Bypass.” The root operation “Drainage” is not appropriate because “Drainage” is meant to provide intermittent relief of an abnormal collection of fluid. Assign the following ICD-10-PCS codes:

**0W1G3JW** Bypass peritoneal cavity to upper vein with synthetic substitute, percutaneous approach.

**0JHT0YZ** Insertion of other device into trunk subcutaneous tissue and fascia, open approach, for the placement of the pump valve. If the device is removed prior to completion of the procedure (found to be inadequate), code both the insertion **02H73DZ** and Removal **02PA3DZ**.

**NOTE:** Successful insertion of a Watchman device is assigned **02L73DL Occlusion** of left atrial appendage with intraluminal device, perc approach.
Neurology:

**Lacunar Infarction**: Provider documents acute lacunar infarct and encephalopathy secondary to the lacunar infarction.

Assign code **I63.81** Other cerebral infarction due to occlusion or stenosis of small artery. Also assign code **G93.49**, Other encephalopathy, since the encephalopathy is not inherent to the lacunar infarct.

If a fusion is performed and the device is not specified, query the provider.

**Joint Fusion Device Value**

Device value “Z No Device” has been deleted from the tables:

0RG Fusion of Upper Joints
0SG Fusion of Lower Joints

**Diabetes with CKD and Hypertension**

As of October 1, 2018, the ICD-10-CM Official Guidelines have been revised to read “Assign codes from category I12, Hypertensive chronic kidney disease, when both hypertension and a condition classifiable to category N18, Chronic kidney disease (CKD), are present. CKD should not be coded as hypertensive if the provider indicates the CKD is not related to the hypertension.”

**Radial Head Arthroplasty Body Part Value**

Radial head replacement surgery is now identified in the following tables:

0PRH Replacement, radius, right
0PRJ Replacement, radius, left

**Coding Clinic Conflicts with Official Coding Guidelines**

When there is a discrepancy between the conventions in the classification, the guidelines and/or advice published in Coding Clinic, coding professionals should adhere to the following hierarchy:

1. Conventions in the ICD-10-CM and ICD-10-PCS classification
2. Official Guidelines for Coding and Reporting
3. Coding Clinic advice.

**Excludes 1 Note Guidance: Peripheral vascular disease and gangrene are documented.**

Referencing the Tabular List, code **I96**, Gangrene, not elsewhere classified, has an Excludes1 note below that excludes “gangrene in other peripheral vascular diseases (I73.-).” This note should be interpreted to mean “not coded here” and that code **I73.-** should be assigned for gangrene in other peripheral vascular disease.

**SDHIA Scholarships for CHIA Student Members**

SDHIA has established a scholarship to support SDHIA CHIA students who have completed 50% of their coursework towards a credential in health information management. SDHIA is committed to helping students complete their education and enable them to successfully embark on their HIM career path. You must be a CHIA student member if you have not signed up please register here: [https://californiahia.org/join](https://californiahia.org/join)

SDHIA scholarship applications has been extended to March 15, 2019 deadline. The eligibility criteria, application, and selection/notification process can be found here:
